

BM-810FM

8 in 1 Processor

ASI input → 8*CVBS output

MPEG-2/H.264/AVS

Product Overview

BM-810FM is a digital processor designed by DEXIN Digital Technology with proprietary intellectual property rights.

It is a 1-U case which supports digital input via ASI. After process, it outputs 8 analog Audios.

Its pluggable structure design greatly facilitates the change of modules as needed.

Key Features

- **1*ASI input**
- **8*CVBS unbalanced stereo audio out**
- **MPEG-2/H.264/AVS+ MPEG-1 Layer 2, AC3 (2.0)**
- **Real-time bit rate monitoring**
- **High reliability design, stable performance**
- **Easy manage with LCD**
